

February 27, 2021

Dear Family Members and Friends of our Residents,

Greetings from the Mullen Home as we near the end of the month of February and look forward to longer days and warmer temperatures!

Regarding the Coronavirus, things continue to go well here at the Home:

- Our weekly COVID testing once again yielded all negative results;
- We have no Residents or Staff with symptoms of COVID;
- The Coronavirus positivity rate in our county is now low enough for our Home to move into regular “indoor visiting” (as defined by the federal and state health authorities who make the guidelines), pending the approval of the state health department. Our preparations for this continue.
- Our reactivation of a limited number of “essential volunteers” for the evening meal service in the dining rooms is going well and has given not only greatly needed help, but also much mutual joy.
- Signs of hope continue!

So that’s it for this week. We trust that you all are keeping safe and well, and we wish you God’s blessings!
