

*November 22, 2021*

Dear Families and Friends of our Mullen Home Residents,

At this time, we sadly report we have a new COVID-19 positive case amongst an employee here at the Mullen Home. Please keep this employee in your thoughts and prayers and wish for a speedy recovery. We have no identified positive COVID-19 resident cases at this time. Please continue to pray we remain this way. We continue to take guidance from the State and local county health departments.

We are all in positive spirit here at the home and continue to be encouraged despite the new positive case.

There are no visitation changes related to the new positive employee case. Both vaccinated and unvaccinated residents are open to visitation at this time. We will continue to remind all visitors to screen upon entering the home, practice continued hand hygiene, wear a well-fitting face mask, practice social distancing and please go directly to your loved one's room avoiding stopping to chat and congregate in the halls.

We at the Mullen Home, as well as the Health Department continue to encourage all visitors to consider receiving the COVID-19 vaccination with hopes to protect yourselves, the residents as well as the employees. The COVID-19 vaccination continues to be offered for the public in the community.

God bless and together we continue to pray to overcome this pandemic.

United in prayer,

*Sr. Sarah, lsp*
