

December 17, 2021

Dear Families and Friends of our Mullen Home Residents,

For the past several weeks the Home has been in mandatory COVID-19 outbreak testing. The last 2 testing cycles had resulted in no new identified positive resident or staff COVID-19 cases.

It is with great sadness we must report, this evening the Home has identified a positive resident COVID-19 case. Please be assured the staff is taking this very seriously and doing what is in our power to try to decrease the risk of the virus spreading to other residents here at the Home. We continue to practice proper infection control practices in order to mitigate the risks to other residents, staff and visitors here at the Home. We pray for an end to this cycle. We do encourage you if it is in your heart to please consider obtaining the COVID-19 vaccination as well as the booster shot if you qualify.

With Christmas quickly approaching, today the residents were able to receive Christmas gifts from the "Wish of a Lifetime" organization. We are all truly grateful for this organization for all that they do for the residents as they give with the spirit with Saint Jeanne Jugan.

The Little Sisters along with the staff will continue to pray that we will soon see an end to this pandemic.

United in prayer, *Sr. Sarah, lsp*
